Activate Nature.

Release 901C™
with **NutriRelease™** Technology

9-0-1

APPLY AS FOLIAR SPRAY OR DRENCH

Release 901C is a powerful and effective liquid fertilizer delivering nutrients to any plant or turf by absorption through roots and leaves. **Release 901C** can be used alongside or mixed with other fertilizers, insecticides, fungicides, and herbicides. For best results, apply early in the morning or in the evening.

Release 901C is a liquid biostimulant and fertilizer with **NutriRelease™** Technology that effectively delivers a wide variety of nutrients through the leaves and root system.

The premium micronized nutrients and carbon in **Release 901C** optimizes absorption and are immediately available to the plant without it having to break down the nutrients to digest them. The nano-sized micronutrients promote rapid growth in soil biology populations, and the liquid carbon provides a home for this biology. The 10% liquid carbon in **Release 901C** creates aeration within the soil to drive deeper root growth.

Release 901C improves water retention in the soil and nutrient uptake (CEC) while serving as a catalyst to enhance the performance of many pesticides and other turf maintenance products. **Release 901C** has proven efficacy. A study showed **NutriRelease™** Technology to be 50 times more effective than Humic 6% at releasing unavailable nutrients in the soil and making them available to the plant. **Release 901C** has been shown to extend nutrient availability in the soil for up to 120 days - 3 times as long as typical fertilizers. A study showed that 9% nitrogen with our liquid carbon and **NutriRelease™** Technology is the equivalent of using 18% nitrogen proving **Release 901C** to be a superior biostimulant and fertilizer.

KEY PRODUCT BENEFITS

- ▶ A natural microbial food source, bio-surfactant, and nutrient solubilizer
- ▶ Solubilizes present minerals and chelates them into plant available form
- ▶ Reduces water, fertilizer and chemical input requirements
- ▶ Aerates soil and reduces compaction
- ▶ Promotes rapid production of beneficial protozoa, fungi, and hyphae for superior soil health
- ▶ Optimizes pH and increases nutrient uptake (CEC)
- ▶ Safe to apply with herbicides, insecticides, fungicides, and other fertilizers

APPLICATION	RATE	FREQUENCY
Tees & Greens	Spray 2-7 ounces per 1,000 SF	Apply every 7-14 days
Fairways & Roughs	Spray 2-7 ounces per 1,000 SF	Apply monthly
Sports Turf	Spray 2-7 ounces per 1,000 SF	Apply monthly
New Sod	Spray the ground with 2-7 ounces per 1,000 SF before laying sod	Apply prior to installation
Lawn Care (Cool & Warm Season Grasses)	Spray 2-7 ounces per 1,000 SF	Apply every 4-6 weeks during the growing season
Plants, Flowers, and Shrubs	Drench - Dilute 1 ounce with 50-100 ounces of water. Foliar - 1 ounce with 100 ounces of water.	Apply monthly
Trees	1-4 ounces per caliper inch.	Apply at installations and 1-4 times per year
Hemp & Cannabis	Drench - Dilute 1 gallon with 50-100 gallons of water. Foliar - Dilute 1 gallon with 100 gallon of water to cover leaves.	Apply as needed or consult your Mirimichi Green representative
